

CLAIMS

I/We claim:

- [c1] 1. A method in a computer system for generating a display page, the method comprising:
- receiving a request to present a display page;
 - retrieving realtime information to be included on the display page;
 - requesting that a computation be performed to generate non-realtime information to be included on the display page;
 - creating a display page that contains the retrieved realtime information and an indication that the non-realtime information is not yet ready to be included on the display page; and
 - sending to a user computer system the created display page for displaying to a user
- wherein when the display page is next requested, the created display page includes the non-realtime information if the computation has been completed.
- [c2] 2. The method of claim 1 wherein the indication that the non-realtime information is not ready to be included on the display page includes a link for requesting the display page.
- [c3] 3. The method of claim 1 wherein the request to present the display page is received from a user.
- [c4] 4. The method of claim 1 wherein the request to present the display page is received when a user logs on to the computer system.
- [c5] 5. The method of claim 4 wherein the display page is a homepage.

[c6] 6. The method of claim 1 wherein the realtime and non-realtime information relates to opportunities.

[c7] 7. The method of claim 1 wherein the computer system supports multiple tenants.

[c8] 8. The method of claim 1 wherein the generated information includes a graphical representation of information.

[c9] 9. A computer system for generating a display page of business information, comprising:

 a component that retrieves realtime business information to be included on the display page;

 a component that requests that a computation be performed to generate non-realtime business information to be included on the display page;

 a component that adds to the display page the retrieved realtime business information, when the non-realtime business information is not yet ready, an indication that the non-realtime business information is not yet ready to be included on the display page, and when the non-realtime business information is ready, the generated non-realtime information; and

 a component that sends to a user computer system the display page for display to a user

 so that the user can view the realtime information even though the non-realtime business information is not yet ready.

[c10] 10. The computer system of claim 9 wherein the indication that the non-realtime business information is not ready to be included on the display page includes a link for requesting the display page.

- [c11] 11. The computer system of claim 9 wherein a request to present the display page is received from a user.
- [c12] 12. The computer system of claim 9 wherein a request to present the display page is received when a user logs on to the computer system.
- [c13] 13. The computer system of claim 12 wherein the display page is a homepage.
- [c14] 14. The computer system of claim 9 wherein the computer system supports multiple tenants.
- [c15] 15. The computer system of claim 14 wherein tenants are from different business organizations.
- [c16] 16. The computer system of claim 9 wherein the generated business information includes a graphical representation of the business information.
- [c17] 17. A method in a computer system for displaying a web page, the method comprising:
- receiving from a web server a web page that includes realtime information and an indication that non-realtime information is not yet ready to be displayed;
 - displaying the received web page to a user;
 - receiving a request from the user to update the web page;
 - sending to the web server a request to update the web page;
 - receiving from the web server the updated web page that includes the non-realtime information; and
 - displaying the updated web page to the user

so that the user can view the realtime information without having to wait for the non-realtime information to be generated.

[c18] 18. The method of claim 17 wherein the indication includes a link for requesting an updated web page.

[c19] 19. The method of claim 17 wherein the information relates to business opportunities.

[c20] 20. The method of claim 17 wherein the web server supports multiple tenants.

[c21] 21. The method of claim 17 wherein the web page is updated whenever it is regenerated by the web server.
